1 Introduction

1.1 Purpose

This document is a changes document to track the changes between revisions of different documents.

2 SRS

User Requirements (Section 3) was changed to System Features (Section 4). This better suits the heading and allows us to write a better System Features section. The control feature was split into autonomous control and manual control. Functional requirements were then added to each requirement.
System Features was added (Section 4).
User Requirements (Section 3) was written.
Priority and *Source* were added to *User Requirements*. Small, general changes.

3 SPMP

Risk Management Plan (Section 5) was updated to clarify classifications of risk type, likelihood, and severity, and make the risk management process clearer.
Documentation Schedule (Table 4) was updated with latest due dates and assignments for all documents.
Branching style was added (feature by feature).
WBS added.
The structure of the document was changed to be more reader friendly.
Referenced GitHub repository figure.

4 SDD

UML diagram was updated for the latest code structure and naming conventions, including XML importing/exporting.
Purpose rewritten.
General changes.
